*"Parents tend to focus on grades and forget the little things... Like how it feels to change into your gym clothes in front of your peers, have no connection with a teacher, and be singled out in class. Even for successful kids, says Thompson, school doesn't come easy."*

Renowned psychologist Michael Thompson will examine the issues parents and children face as outlined in his latest book, *The Pressured Child: Helping Your Child Find Success in School and Life*, written with Teri Barker.

Michael Thompson, PhD., is a consultant, author, and psychologist specializing in children and families. He has conducted more than 200 problem-solving workshops with parents, teachers, and students. He lectures on topics pertaining to the development of self and social cruelty in the lives of children.

His Books Include:

*Raising Cain: Protecting the Emotional Life of Boys*  
*Best Friends, Worst Enemies: Understanding the Social Lives of Children*  
*Mom, They're Teasing: Helping Your Child Solve Social Problems*
